

E-signature & ID Verification

SPS offers a compliant electronic signature solution that provides online esignature, together with identification verification as standard. Improve your contract management and send, sign and exchange documents onine in minutes using SmartSign!

Our standard product offers both advanced and qualified esignature solutions with built in ID verification, saving you valuable time by verifying the person you are dealing with. Save time, improve rates of signature and benefit from our automated verification service to provide fast and efficient ID verification for your customers.

Improve Compliance

Full audit trail, activity reporting, certification and geolocation features to ensure integrity of signatures and compliance.

Signature Rates

Increase the number of clients completing, signing and returning your documentation.

Ease of Access

Transactions can be completed from desktop, pc, laptop, tablet or mobile device.

Reduce Costs

VSiD offers a low cost solution, with E-signature and ID sign as standard features.

Fast Deployment

Our VSiD platform can be deployed and integrated quickly and easily.

Save Time

Automated ID verification enables efficient processing. Provide digital evidence rather than physical documents.

The Power of Possibility

With a range of simple, advanced and qualified electronic signatures, you can be assured of receiving the most cost effective solution that delivers the highest level of security and reliability to meet today's business needs. Together with our dynamic fillable SmartForms, we can help streamline onboarding workflows and sign-up customers faster.
Product features include:

1 Electronic Signature

Easy to use E-signature solution with full audit trail. Add documents via upload, dropbox or smart forms.

2 ID Verification

Qualified esignatures, with name and document checking as standard.

3 Configurable Workflows

Configure workflows to ensure business needs are met with esignature sequencing.

4 Templates & Attachments

Use templates and attachments for each transaction. Enable set fields to save time. Add additional fields where needed.

5 Compliance

Compliant with EIDAS Regulations, our innovative esignature product offers advanced and qualified signature with identity certification.

6 Geolocation Security

Strict browser geolocation ensures witness signatures are within a 10 metre geolocation of the signer.
